--> Competitive Programming Enthusiast with sound knowledge of Data Structures and Algorithms. Achieved a rating of 2000+ on CODECHEF in 6 months. Qualified for ACM ICPC regionals and secured 48 regional rank at kolkata-kanpur region.

--> Core Team Member @ GeeksforGeeks.

--> Lead the entire content on Data Structures, Algorithms, Interview prep, etc. Find the details below in the work experience section!

-> Leading other two products GFG Practice and GFG Courses.

Experience

GeeksforGeeks
3 years 3 months

Product Manager
April 2020 - Present (5 months)
Noida, Uttar Pradesh, India

Responsible for managing and building new teams and products to grow:

1. practice.geeksforgeeks.org

2. GeeksforGeeks Courses

3. Other upcoming products.

GeeksforGeeks Practice, Courses
April 2019 - April 2020 (1 year 1 month)
Noida, Uttar Pradesh, India

Along with content related to DS, Algo, C++, Java, Interview Prep, etc., I went on to manage the entire team working behind (practice.geeksforgeeks.org) and the new venture GfG Courses (geeksforgeeks.org/courses/).

Lead three independent teams of around 30 people (Full time as well as remote) to completely manage all of these three products.
➡# Content: As described in the last experience.
➡# GFG Practice: This is a coding platform where users can practice and learn programming questions. I am responsible for improving it and taking it further.
➡# GFG Courses: A new initiative by the GFG team to upskill engineers, and students. I am managing the entire team working on online self-paced courses. I was responsible for complete ideation to the successful execution of some paid courses which are now bestsellers and trusted by thousands of students and engineers globally.

With managing programs above, other responsibilities include:
-> Understanding the market needs to grow these businesses.
-> Coordinating with the dev team for adding new features, improvements, etc.
-> Hiring mentors/ Interviewing candidates.
-> Developing growth strategies to scale businesses, increase visibility.
-> Setting up new teams.
-> Advices on other products/campaigns/intiatives.

Technical Content Lead
June 2018 - April 2019 (11 months)
Noida Area, India

Joined GeeksforGeeks full time to lead the entire content team working on Data Structures and Algorithms.

Lead a team of around 8- 9 people to manage the entire content on DS, Algo, Programming Languages, Interview Prep etc.

Worked on improving SEO.

Worked on different marketing campaigns as well.

Planned and launched first two interview preparation courses namely sudo placement, which received more than 50,000 enrollments.

I was completely responsible for everything new or improving old content on GeeksforGeeks related to the topics mentioned!

Engineering Intern
June 2017 - June 2018 (1 year 1 month)
Noida Area, India

Worked on reviewing articles on Data Structures and Algorithms received by public contributors.

Setting problems based on data structures and algorithms on practice.geeksforgeeks.org

Promoted content writing at GeeksforGeeks in my college campus and successfully converted 10% of the students to write on GeeksforGeeks.

Created written tutorials on Basics of ReactJs.

Took an initiative to add content on "Web Technologies" on GeeksforGeeks by encouraging remote contributors to write articles on PHP.

Managed remotely all of the content generated by public contributors on PHP.

Allmniedu
Freelance Web Developer
December 2016 - December 2016 (1 month)

Developed complete website for this coaching institute.
The website is currently available at: http://www.allmniedu.in

The Shipper
Backend development Intern
June 2016 - August 2016 (3 months)
Kolkata

Worked on backend of two android application at The Shipper - Android application for Customer and Android application for Driver. Also worked on optimization of SQL queries, front end design and Search Engine Optimization of The Shipper website.
